Lycopene β

Suggested Use:
One capsule once daily after meals
or as directed by healthcare
practitioner.

Lycopene β Softgel Capsules is obtained from *Momordica cochinchinensis*, commonly known as “GAC” and standardized to contain a minimum of 10% lycopene and 5% β -carotene.

Lycopene is a red plant pigment found in tomatoes, apricots, watermelons, guavas, papaya, grape fruits and rosehips, with tomatoes being the largest contributor to the dietary intake of humans until GAC from Vietnam was made available to the world.

Due to its nutritional value, intake of this fruit may greatly enhance the nutritive value of the diet.

Lycopene β is a natural herbal antioxidant supplement with lycopene and β -carotene. Lycopene with β -carotene can significantly decrease oxidative DNA damage to human lymphocytes.

Each Vegetarian Softgel Capsule Contains:

Ingredient	Quantity per Capsule
Momordica cochinchinensis extract from red membrane of seed (Standardized to Not Less Than 10% Lycopene and Not less Than 5% β -Carotene)	150 mg
BioPerine [®] * (<i>Piper nigrum</i> fruit Extract)	2.5 mg
