

Calci D Max

ENHANCING BONE DENSITY

60 count
Tablets

gras
Generally Recognized As Safe

BioPerine® is U.S.A. GRAS self
affirmed ingredient

BENEFITS

- Maintains bone mass retention
- Supports overall bone health
- Improves bone mineral density
- Reduces the risk of fractures

Calci D Max

Suggested Usage:
One tablet twice a day after meals
or as directed by physician

Bones give basic frame work and shape to our body, support and protect various organs, produce red and white blood cells and store minerals. There are several cells that constitute a bone with specific functions.

Healthy bones need to be stiff and resist deformation and at the same time be flexible to withstand compression and tension without cracking. However, several factors may lead to poor health of the bone, namely lack of physical activity, smoking, alcohol consumption, diet, genetic and hormonal factors.

Calcium is the most abundant mineral in the human body. Calcium Citrate Malate (CCM) is a "Nutrient-dense Calcium Supplement" derived from citric and malic acids and the most bioavailable form of calcium.

Vitamin D3 or the sunshine vitamin is essential for musculoskeletal health, as it promotes calcium absorption.

Zinc has shown to stimulate bone protein synthesis. Zinc also has a stimulatory effect on the production of osteoblasts.

Sami Direct's Calci D Max is a unique combination of ingredients to support bone health.

Each Tablet contains:

Ingredient	Quantity per Tablet
Calcium citrate malate (Contains 82 mg of elemental calcium)	400 mg
Vitamin D3 (Cholecalciferol)	200 IU
Zinc monomethionine (Containing 3 mg of elemental Zinc & 6 mg Methionine)	15 mg
BioPerine [®] * (<i>Piper nigrum</i> fruit Extract)	2.5 mg
